

WHAT IS CLAIMED IS:

1. A vehicle wiper assembly having a swingable wiper arm provided in the vicinity of a windshield and a wiper blade attached to a tip end of said wiper arm for wiping said windshield, comprising:
 - a wiper motor for driving said wiper arm, and
 - said wiper motor is attached to a vehicle body so as to move inside the vehicle body by an external force.
2. The vehicle wiper assembly according to claim 1, further comprising:
 - a first support member swingably attached to the vehicle body at one end and fixed to the vehicle body at the other end, and
 - a first weak point having low rupture strength provided in the vicinity of a vehicle fixing section.
3. The vehicle wiper assembly according to claim 1, further comprising:
 - a second support member fixed to the vehicle body at both ends, and a second weak point having said low rupture strength provided in the vicinity of said vehicle fixing section.
4. The vehicle wiper assembly of any one of claim 1 to claim 3, wherein each of said first weak point and said second weak point having low rupture strength is provided in the vicinity of a vehicle fixing section of a pivot holder for rotatably supporting a pivot shaft for attaching a base end section of the wiper arm.
